Treasury and Payment Services

Quick Reference Guide - Transfer Center

The Transfer Center workspace provides all the tools you need to initiate, view and manage account transfers. In the Transfer Center, you can:

- Initiate one-time transfers; view, delete or modify scheduled transfers
- Set up recurring transfer instruction; view or delete recurring transfer series
- Create reusable transfer templates; view, delete or modify templates
- Import transfers from a file; view, create, modify or delete import maps

To access the Transfer Centers workspace, open the left navigation menu, click to expand the Payments & Transfers menu, then select the Transfer Center link.

TRANSFERS TAB

The Transfers Tab displays all completed, in progress and future transfers that you have permissions to view, modify and/or delete. The Entry Method column indicates the nature of each transfer: whether it was created individually (either as freeform or by using a template), or whether it is one of a series created by a recurring transfer instruction.

TRANSFERS							
TRANSFERS	RECURRING TRANSFERS	TRANSFER TEMPLATES	IMPORT MANAGER				
Initiate Transfer(s)							
As of 06/11/2020 12:18 PM							
<input type="checkbox"/> ALL	ACTIONS	STATUS	ENTRY METHOD	FROM ACCOUNT	FROM ACCOUNT NAME	TO ACCOUNT	TO ACCOUNT NAME
<input type="checkbox"/>	...	Scheduled	Recurring Instruction 1308	36254512	Building Loan	10010002	Payroll Account
<input type="checkbox"/>	...	Deleted	Recurring Instruction 1308	10010001	Accounts Payable	10010003	Payroll Account
<input type="checkbox"/>	...	Deleted	Recurring Beave	10010001	Accounts Payable	123123123	Office Supplies
<input type="checkbox"/>	...	Scheduled	Recurring Tour1	10010001	Accounts Payable	87764467	CC
<input type="checkbox"/>	...	Scheduled	Recurring Arizona	10010001	Accounts Payable	36254512	Building Loan
<input type="checkbox"/>	...	Deleted	Recurring Instruction 1308	10010001	Accounts Payable	10010003	Capital Account
<input type="checkbox"/>	...	Scheduled	Recurring Monthly Draw	10010001	Accounts Payable	36254512	Building Loan
<input type="checkbox"/>	...	Scheduled	Freeform	36254512	Building Loan	7777	Fleet Vehicles
<input type="checkbox"/>	...	Scheduled	Recurring Green123	10010001	Accounts Payable	123123123	Office Supplies
<input type="checkbox"/>	...	Scheduled	Recurring Instruction 1297	10010001	Accounts Payable	36254512	Building Loan

As with other tabs and widgets, you can control and personalize the list view:

- Choose which columns are displayed or hidden, change the column order
- Filter the data, choose a column for the data sort order
- Save a useful combination of column and data settings for later reuse
- Print the list content or export it to a CSV file

View and Manage Transfers

Click on the ••• in the Action column to get a pop-up menu of available actions for any entry on the list.

- View Displays the transfer details as read-only text.
- Modify Displays the transfer details with input fields so you can change some of the info. The input fields are exactly the same as those you use when initiating a transfer. NOTE: Modify is available only for transfers with status Scheduled (i.e., not for transfers that already have been executed or deleted).
- Delete Deletes the transfer. NOTE: Delete is available only for transfers with status Scheduled (i.e., not for transfers that already have been executed or deleted).

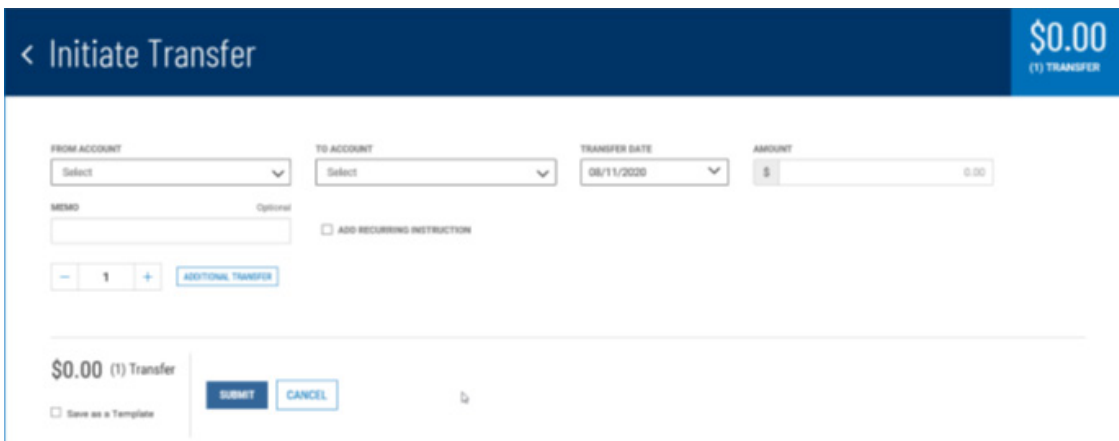

Initiate Transfers

To initiate a transfer, click the Initiate Transfer(s) link:

When you click the link, it expands to show all of the fields that define an account transfer.

NOTE: All fields are required unless explicitly labeled Optional.

A screenshot of the 'Initiate Transfer' form. The form has a dark blue header with a back arrow, the text '< Initiate Transfer', and a balance display of '\$0.00 (1) TRANSFER'. The form fields include: 'FROM ACCOUNT' (dropdown menu), 'TO ACCOUNT' (dropdown menu), 'TRANSFER DATE' (dropdown menu showing '08/11/2020'), and 'AMOUNT' (input field showing '\$ 0.00'). There is also a 'MEMO' field labeled 'Optional' and a checkbox for 'ADD RECURRING INSTRUCTION'. Below the fields, there are minus and plus buttons next to the number '1', and an 'ADDITIONAL TRANSFER' button. At the bottom, there is a summary line showing '\$0.00 (1) Transfer', a 'Save as a Template' checkbox, and 'SUBMIT' and 'CANCEL' buttons.

To initiate a single one-time transfer

Fill out all required fields (plus the optional Memo field, if relevant), then click Submit. The on screen confirmation will show that your transfer was sent to the financial institution for processing.

HINT: If this is a transfer that you're likely to repeat, click the Save as a Template checkbox, and enter a good descriptive name in the input field. Later you can initiate a similar transfer from the Transfer Templates tab by using this template.

APPROVALS

If your company requires approval for account transfers the on screen confirmation will indicate the approval requirement:

Your transfer will remain in a Requires Approval status until another user approves it.

To initiate multiple one-time transfers

Set the number control by using the + and - buttons, then click the Additional Transfer button; for each additional transfer, the system will add a panel with a new set of input fields. (If you find you don't need an additional transfer panel, you can leave the fields blank or you can click the X at its top right-hand corner to delete it from the screen.)

Fill out all required fields (plus the optional Memo field, if relevant) for each transfer, then click Submit.

APPROVALS

As described earlier for a single one-time transfer, if your financial institution requires approval then the on screen confirmation will say so and your transfers will remain in a Requires Approval status until another user approves them.

To add a new recurring transfer series

Click the Add Recurring Instruction checkbox:

A screenshot of a web application form titled "Initiate Transfer". The form has a blue header with a back arrow and the text "< Initiate Transfer". On the right side of the header, there is a blue box containing "\$0.00" and "(1) TRANSFER". The form contains several input fields: "FROM ACCOUNT" (dropdown menu), "TO ACCOUNT" (dropdown menu), "TRANSFER DATE" (dropdown menu), and "AMOUNT" (text input field with a dollar sign and "0.00"). Below these fields is a "MEMO" field with the label "Optional". Below the memo field is a checkbox labeled "ADD RECURRING INSTRUCTION", which is circled in red. Below the checkbox are two buttons: a minus sign, a "1" in a box, and a plus sign, followed by an "ADDITIONAL TRANSFER" button. At the bottom of the form, there is a summary section showing "\$0.00 (1) Transfer" and a "Save as a Template" checkbox. Below this are "SUBMIT" and "CANCEL" buttons.

The system will display the Recurring Instruction panel:

Recurring Instruction

NAME

NEXT TRANSFER DATE
08/12/2020

Please select date at least one business day after initial Transfer Date

REPEAT
Weekly

EVERY
1

WEEK(D)
S M T W T F S

ENDS
 Never
 End by selected date

Fill out all of the fields, then click Submit. Give each recurring series a good descriptive name, for ease of management later.

NOTE: You can set up only one recurring transfer at a time.

IMPORTANT!

If you set up a recurring transfer from the Transfers tab, you will get an immediate transfer plus the scheduled recurring ones.

If you want to set up a recurring transfer series without an immediate transfer to start, use the Recurring Transfers tab.

APPROVALS

If your company requires approval then the on screen confirmation will say so and your transfers will remain in a Requires Approval status until another user approves them.

NOTE: Each transfer in a recurring transfer series requires its own explicit approval. That is, an approver can't give a "blanket" approval for the series as a single entity.

Approval Process

If you have Transfer Approval permissions, you will be notified on the Home workspace that there are transfers for you to approve.

ACTION ITEMS

Payments To Approve	View
Account Transfers To Approve	View

Clicking to view, will take you to the Transfer Center and you will have a Requires My Approval list view in the Transfers tab to approve or reject one-time or recurring transfers.

Select to view the Requires My Approval list view to see all of the transfers that you are able to Approve, Delete or Reject.

Approve a Single Transfer

To approve a single transfer, click the ••• in its Action column and click Approve. The system will display a dialog box with details:

Click Continue to complete the approval; the display will update so that the approved transfer is no longer displayed in the filtered list (because it's no longer in Requires My Approval status). An on screen confirmation shows that the transfer was approved, and you can click the > button to see the transfer details

Approve Multiple Transfers

To “bulk-approve” several transfers at once, click each transfer’s checkbox and then click the Approve button at the bottom of the list. The system will display a dialog box with the details for all of the selected transfers; click Continue to complete the approval process.

The on screen confirmation display is similar to those described earlier for a single transfer, just adapted for multiple transfers.

Reject Single or Multiple Transfers

The process for rejecting transfers is identical to that for approving them, just select Reject as the action for a single transfer or click the Reject Button to “bulk-reject” several transfers at once.

RECURRING TRANSFERS TAB

The Recurring Transfers Tab list contains all recurring transfer instructions that you have permissions to view, modify and/or delete. Unlike the Transfers tab, this list does NOT show individual transfers.

The screenshot shows the 'RECURRING TRANSFERS' tab in a web application. At the top, there are navigation tabs: 'TRANSFERS', 'RECURRING TRANSFERS' (highlighted), 'TRANSFER TEMPLATES', and 'IMPORT MANAGER'. Below the tabs is a 'Create Recurring Transfer Instruction' button and a search bar. The main area contains a table with columns: 'SELECT', 'ACTION', 'NAME', 'FROM ACCOUNT', 'TO ACCOUNT', 'CREATED BY', 'AMOUNT', 'NEXT DATE', 'STATUS', and 'SCHEDULE'. The table lists several recurring transfer instructions with details like 'Test1', 'Payroll', 'Monthly Draw', and 'Instruction 1234'. At the bottom, there is a 'PRINT' button and a 'DISPLAY' dropdown menu.

SELECT	ACTION	NAME	FROM ACCOUNT	TO ACCOUNT	CREATED BY	AMOUNT	NEXT DATE	STATUS	SCHEDULE
<input type="checkbox"/>	...	Test1	10010001	8794667	Admin	1.00	Invald date		Monthly on the 15th of every month from 08/06/2020 and cancelled.
<input type="checkbox"/>	...	Payroll	123123123	23235232	Admin	0.84	Invald date		Weekly every week on Friday from 07/10/2020 and cancelled.
<input type="checkbox"/>	...	Monthly	36234512	10010001	Admin	2.22	Invald date		Weekly every week on Thursday from 07/14/2020 and cancelled.
<input type="checkbox"/>	...	Monthly Draw	10010001	36234512	Admin	0.03	Invald date		Monthly on the 1st of every month from 07/11/2020 and cancelled.
<input type="checkbox"/>	...	John	10010001	23235232	Admin	0.99	Invald date		Weekly every week on Friday from 07/11/2020 and cancelled.
<input type="checkbox"/>	...	Instruction 1234	36234512	10010001	Admin	0.33	Invald date		Monthly on the 15th of every month from 08/06/2020 and cancelled.
<input type="checkbox"/>	...	Instruction 1237	5666	10010001	Admin	0.08	Invald date		Weekly every week on Friday from 06/24/2020 and cancelled.
<input type="checkbox"/>	...	Instruction 1201	10010001	10010001	Admin	476.67	Invald date		Monthly on the 2nd Tuesday of every other month from 04/24/2020 and cancelled.
<input type="checkbox"/>	...	Instruction 1200	10010001	001000000	Admin	87.77	Invald date		Monthly on the 1st of every other month from 04/14/2020 and cancelled.
<input type="checkbox"/>	...	Instruction 1298	10010001	123123123	Admin	0.25	Invald date		Monthly on the 28th and 29th of every 3rd month from

As with other tabs and widgets, you can control and personalize the list view:

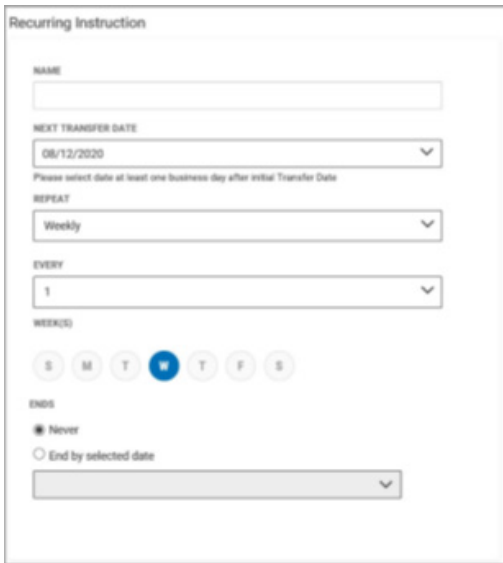

- Choose which columns are displayed or hidden, change the column order
- Filter the data, choose a column for the data sort order
- Save a useful combination of column and data settings for later reuse
- Print the list content or export it to a CSV file

Add a recurring transfer series

Click the Add Recurring Instruction checkbox:

The system will display the Recurring Instruction panel:

The image shows a 'Recurring Instruction' form with the following fields and options:

- NAME:** A text input field.
- NEXT TRANSFER DATE:** A dropdown menu showing '08/12/2020'. Below it is a note: 'Please select date at least one business day after initial Transfer Date'.
- REPEAT:** A dropdown menu showing 'Weekly'.
- EVERY:** A dropdown menu showing '1'.
- WEEK(D):** A row of seven circular buttons labeled S, M, T, W, T, F, S. The 'W' button is highlighted in blue.
- ENDS:** Two radio button options: 'Never' (selected) and 'End by selected date'.
- End by selected date:** A date input field with a dropdown arrow.

Fill out all of the fields, then click Submit. **NOTE:** You can set up only one recurring transfer at a time.

IMPORTANT!

If you set up a recurring transfer from the Recurring Transfers tab, you will get only the scheduled recurring ones – you will not get an immediate transfer to start the series right away.

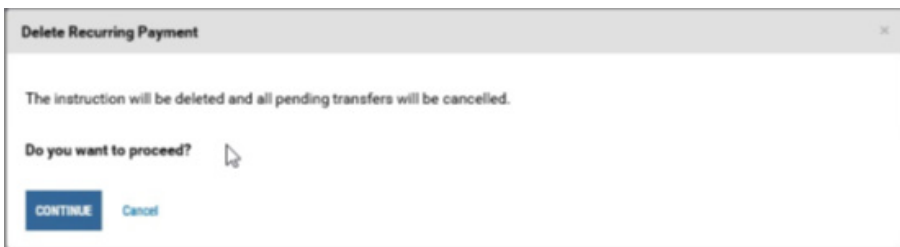

If you want to set up a recurring transfer plus an immediate transfer all in one action, use the Transfers tab.

Approval Process - Recurring

There is no approval process for setting up a recurring transfer instruction – if your company requires transfer approvals, each transfer in the series will need its own explicit approval. See the Transfers Tab Approval Process section for details.

Delete a Recurring Transfer Series

To delete one recurring transfer instruction, click the ••• in its Action column and click Delete. The system will display a dialog box with details:

The image shows a dialog box titled 'Delete Recurring Payment' with the following content:

- Text: 'The instruction will be deleted and all pending transfers will be cancelled.'
- Text: 'Do you want to proceed?' with a mouse cursor pointing to the right.
- Buttons: 'CONTINUE' (highlighted in blue) and 'Cancel'.

Click Continue to complete the deletion; the display will update and the deleted series will be gone. An on screen confirmation shows that the instruction was deleted successfully, and you can click the > button to see the details.

Delete Multiple Recurring Transfer Series

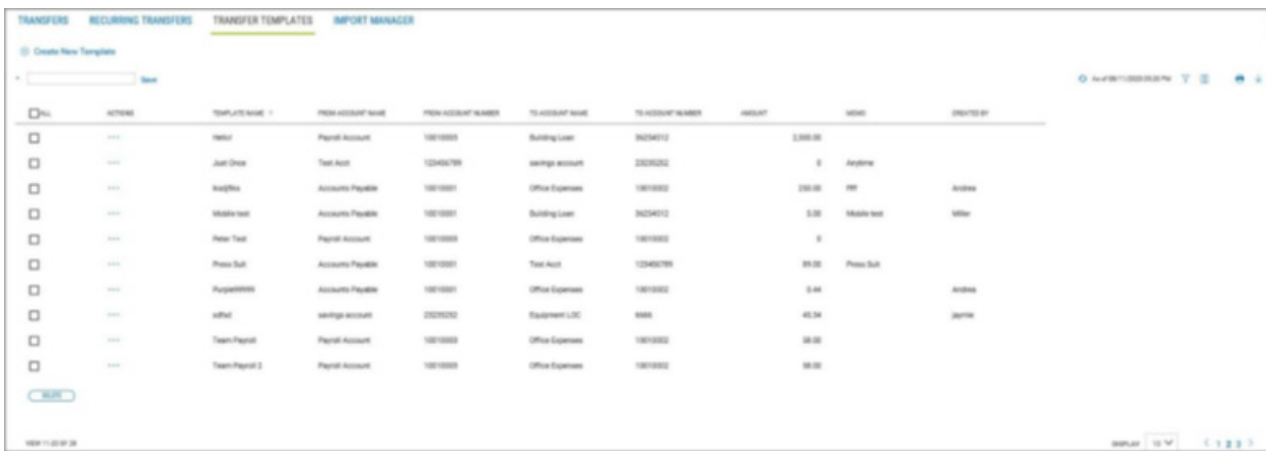

To “bulk-delete” several instructions at once, click each transfer’s checkbox and then click the Delete button at the bottom of the list. The system will display a dialog box with the details for all of the selected instruction; click Continue to complete the approval process.

The on screen confirmation is similar to those described earlier for a single recurring transfer instruction, just adapted for multiple instructions.

TRANSFER TEMPLATES TAB

Transfer Templates are pre-defined sets of transfer information that you can reuse.

The Transfer Templates list view shows all transfer templates that you have permissions to view, modify, delete and/or use to initiate a transfer. Any time you initiate a transfer on the Transfers tab, you can save its information in a template; you also can create new transfer templates here.

☐	ACTIONS	TEMPLATE NAME	FROM ACCOUNT NAME	FROM ACCOUNT NUMBER	TO ACCOUNT NAME	TO ACCOUNT NUMBER	AMOUNT	MEMO	CREATED BY
<input type="checkbox"/>	...	WELL	Payroll Account	10010001	Building Loan	30234012	2,500.00		
<input type="checkbox"/>	...	Just One	Test Acc	123456789	Savings account	2323232	0	Anyline	
<input type="checkbox"/>	...	WELL	Accounts Payable	10010001	Office Expenses	10010002	200.00	PH	Admin
<input type="checkbox"/>	...	WELL	Accounts Payable	10010001	Building Loan	30234012	5.00	WELL	WELL
<input type="checkbox"/>	...	Phone Test	Payroll Account	10010001	Office Expenses	10010002	0		
<input type="checkbox"/>	...	Phone Sub	Accounts Payable	10010001	Test Acc	123456789	89.00	Phone Sub	
<input type="checkbox"/>	...	Purchase	Accounts Payable	10010001	Office Expenses	10010002	0.00		Admin
<input type="checkbox"/>	...	WELL	Savings account	2323232	Equipment LLC	9999	45.50		JayM
<input type="checkbox"/>	...	Team Payroll	Payroll Account	10010001	Office Expenses	10010002	50.00		
<input type="checkbox"/>	...	Team Payroll 2	Payroll Account	10010001	Office Expenses	10010002	50.00		

As with other tabs and widgets, you can control and personalize the list view:

- Choose which columns are displayed or hidden, change the column order
- Filter the data, choose a column for the data sort order
- Save a useful combination of column and data settings for later reuse
- Print the list content or export it to a CSV file

View, Manage and Use Templates

Click the ••• in the Action column to get a pop-up menu of available actions for any entry on the list.

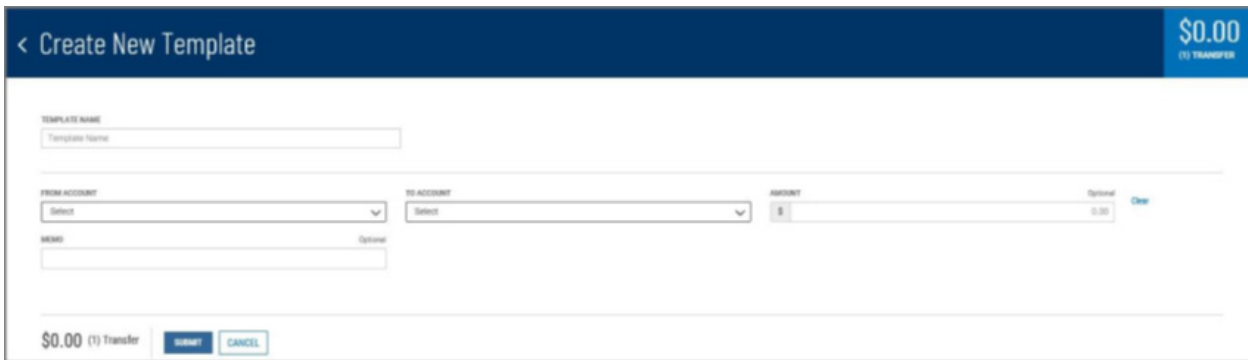

- View Displays the template details as read-only text.
- Modify Displays the template details with input fields so you can change some of the info. The input fields are exactly the same as those you use when creating a template.
- Delete Deletes the template.
- Initiate Transfer Initiates a transfer using the template. The system displays a panel very similar to the one for initiating a transfer from the Transfers tab; you can modify the Date, Amount and Memo fields but the From Account and To Account fields are locked.

Create A New Template

Click on the Create New Template link:

The system will display the Create New Template panel:

A screenshot of the 'Create New Template' form. The form has a dark blue header with a back arrow and the text '< Create New Template'. In the top right corner of the header, it displays '\$0.00 (1) TRANSFER'. The form contains several fields: 'TEMPLATE NAME' with a text input field; 'FROM ACCOUNT' and 'TO ACCOUNT' with dropdown menus; 'AMOUNT' with a text input field and a 'Clear' button; and 'MEMO' with a text input field and an 'Optional' label. At the bottom left, it shows '\$0.00 (1) Transfer' and two buttons: 'SUBMIT' and 'CANCEL'.

Fill out the From Account and To Account, and give the template a good descriptive name. Note that the Amount and Memo fields are optional here; you can fill them with default values or leave them blank in the template. Either way, you will be able to modify them when you use the template to initiate a transfer.

Import Manager Tab

Premier can import transfer definitions from external files. This is useful if you have third-party software that generates files of transfer instructions; you just have to define a map so the system knows how to locate the required data elements in your file.

IMPORTANT!

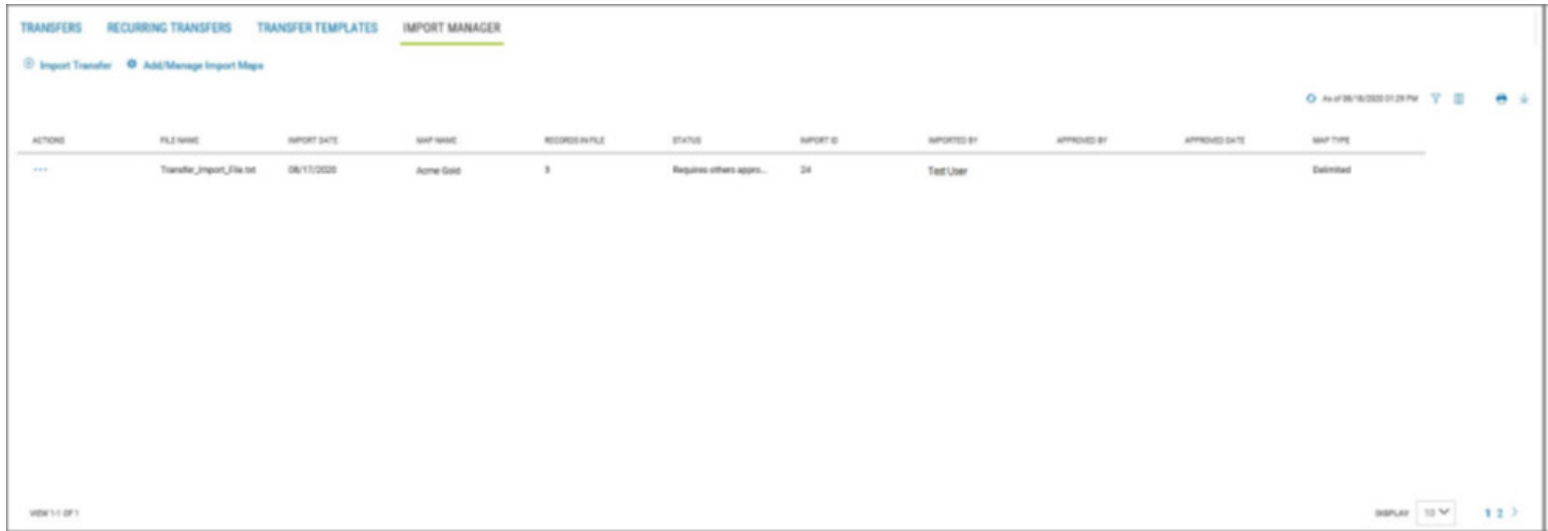

Imported transfers can be current-dated or future-dated, but all of the transfers in an import file must have the same processing date. If you want to import a set of transfers with different dates, break them up into separate files, each containing transfers with the same processing date.

Treasury Online treats import files as a block:

- A file import either succeeds and all transfers are imported, or it fails and no transfers are imported – even if only one of the transfer records resulted in an error.
- If your company requires approval for imports, you just have to get one approval for the file – you don't need a separate approval for each imported transfer.

Import a Transfer File

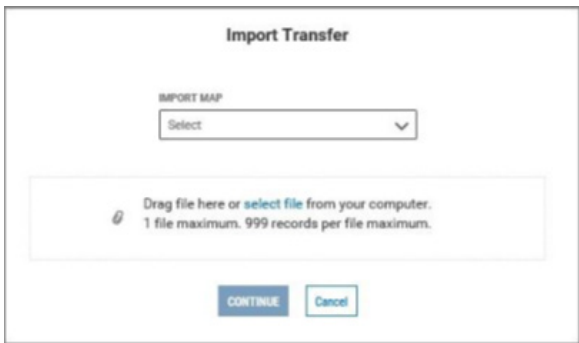

In order to import a file, you must have a map that defines its layout. If you don't already have a map set up for the file you wish to import, see the manage Import Maps and Create a Map sections for instructions.

The screenshot shows the 'IMPORT MANAGER' section of a web application. It features a navigation bar with tabs for TRANSFERS, RECURRING TRANSFERS, TRANSFER TEMPLATES, and IMPORT MANAGER. Below the navigation bar, there are two sub-tabs: 'Import Transfer' and 'Add/Manage Import Maps'. A table displays a list of import records with the following columns: ACTIONS, FILE NAME, IMPORT DATE, MAP NAME, RECORDS IN FILE, STATUS, IMPORT ID, IMPORTED BY, APPROVED BY, APPROVED DATE, and MAP TYPE. A single record is visible with the following details: FILE NAME: Transfer_Import_File.txt, IMPORT DATE: 06/17/2020, MAP NAME: Acme Gold, RECORDS IN FILE: 3, STATUS: Requires others appro..., IMPORT ID: 24, IMPORTED BY: Test User, APPROVED BY: (blank), APPROVED DATE: (blank), and MAP TYPE: Default. The interface also includes a date filter 'As of 06/16/2020 01:28 PM', a 'DISPLAY' dropdown set to '10', and a 'VIEW 1 OF 1' indicator.

ACTIONS	FILE NAME	IMPORT DATE	MAP NAME	RECORDS IN FILE	STATUS	IMPORT ID	IMPORTED BY	APPROVED BY	APPROVED DATE	MAP TYPE
...	Transfer_Import_File.txt	06/17/2020	Acme Gold	3	Requires others appro...	24	Test User			Default

Click the Import Transfer link to start. The system will display the Import Transfer screen:

The screenshot shows the 'Import Transfer' screen. It features a title 'Import Transfer' and an 'IMPORT MAP' dropdown menu with 'Select' as the current selection. Below the dropdown is a large text area with the instruction: 'Drag file here or select file from your computer. 1 file maximum. 999 records per file maximum.' At the bottom of the screen, there are two buttons: 'CONTINUE' and 'Cancel'.

Select the appropriate map from the dropdown, and either click the “select file” link and locate the transfer file within the dialog box, or drag-and-drop the transfer file, then click Continue. You'll see an on screen confirmation like this:

Click the View Details of Import link to see a summary of what was imported. (If the import failed, the details will help you understand how to fix your file and try again.) Your import will now display in the list with a status of Failed, Success or Requires Others Approval.

If the import was successful, there are several possible paths for what happens next:

Import status “Success”

- If the transfers are current-dated, they are processed right away.
- If the transfers are future-dated, they are held with all other future-dated transfers, and will be processed on the appropriate date.

In either case, you can see the imported transfers on the Transfers tab list.

Import status “Requires Others Approval”

If your company requires approval for imported transfers, the file will stay in this status until another user with approval permissions approves it.

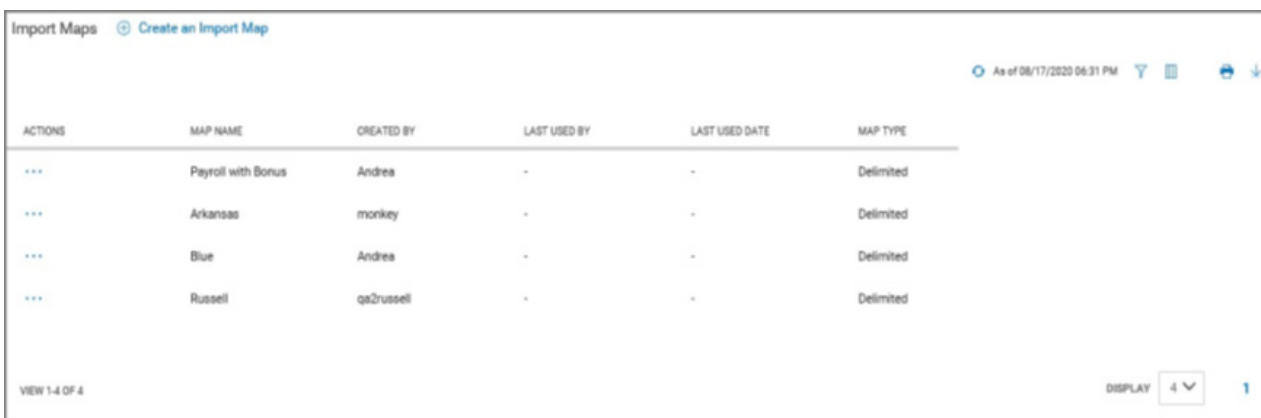

Approval Process

If you have approval permissions, navigate to the Import Manager tab and set the filter. Click the ••• in the Action column to get a pop-up menu of available actions for any entry on the list.

- View Displays the import details as read-only text.
- Approve the imported transfers. They will be processed right away if current-dated, or held with all other future-dated transfers, and will be processed on the appropriate date.
- Delete the imported transfers.

MANAGE IMPORT MAPS

Click the Add/Manage Import Maps link. The system displays a list of import maps:

The screenshot shows a table titled "Import Maps" with a "Create an Import Map" link. The table has columns for ACTIONS, MAP NAME, CREATED BY, LAST USED BY, LAST USED DATE, and MAP TYPE. There are four rows of data, all with "Delimited" map types. The bottom right of the table shows a "VIEW 1-4 OF 4" indicator and a "DISPLAY" dropdown menu set to "4".

ACTIONS	MAP NAME	CREATED BY	LAST USED BY	LAST USED DATE	MAP TYPE
•••	Payroll with Bonus	Andreas	-	-	Delimited
•••	Arkansas	monkey	-	-	Delimited
•••	Blue	Andreas	-	-	Delimited
•••	Russell	qa2russell	-	-	Delimited

Click the ••• in the Action column to get a pop-up menu of available actions for any entry on the list.

- View Displays the map details as read-only text.
- Modify Displays the map details with input fields so you can change some of the info. The input fields are exactly the same as those you use when creating a map.
- Delete Deletes the map.

Create an Import Map

Click the Create an Import Map link. The system displays the Create Import Mapping screen:

The screenshot shows a web form titled "Create Import Mapping". At the top, there is a "Map Name" field and a "Delimiter" dropdown menu. Below these is a checkbox labeled "Skip First Header Record". The main section of the form is titled "Transfer Data Fields" and contains six rows, each with a field name and a corresponding input field. The fields are: "From Account Number (2)", "To Account Number (2)", "Amount (2)", "Processing Date (2)", "Date (2)", and "Reference Number (2)". At the bottom of the form, there are three buttons: "Save", "Cancel", and "Clear".

Every map is tailored to a specific type of file. The map tells DBIQ-P how to parse the file and find all of the required data elements so that the system can generate the appropriate account transfer transaction records. DBIQ-P assumes that there will be one transfer record per line.

Map Name: Give your new map a good descriptive name.

Delimiter: Select the appropriate delimiter (data field separator) from the dropdown. DBIQ-P is designed to work with all of the standard delimiter characters:

- Comma (,)
- Asterisk (*)
- Colon (:)
- Semicolon (;)
- Backslash (\)
- Forward Slash (/)
- Pipe (|)
- Tab (' ')

Skip Header Record: Click the checkbox if the first record in your file has “column header” names rather than transfer data.

There are six transfer data fields, four of which are always required and two that are optional. Your map assigns each field a number to specify the location in which the fields appear in your file’s records. (You could think of it as the column number in a spreadsheet.)

Field Name	Description	Remarks
From Account Number	Funding (debit) account	Click the Strip Zeros checkbox if your file pads account numbers with leading zeroes but they are not padded in Premier
To Account Number	Receiving (credit) account	Click the Strip Zeros checkbox if your file pads account numbers with leading zeroes but they are not padded in Premier
Amount	Dollar amount to be transferred	Click the Strip Zeros checkbox if your file pads amount fields with leading zeroes
Processing Date	Date on which the transfer is to be executed	Format is mmddyyyy
Additional Info	Typically the transfer memo, if applicable	Optional
Sequence Number	The order in which you want the transfers processed, if applicable	Optional; use only if there are dependencies between transfers (i.e., if one transfer will fail for Non-sufficient Funds, if it's processed before another related one)

Example

Suppose you had a file that looked like this:

```
From,To,Date,Amt,Memo,Sequence
0000100123,0000200348,09012020,2000.00,Capital account,1
0000200455,0000100892,09012020,766.53,Operating account,2
0000200348,0000300464,09012020,1200.00,Sep loan payment,3
```

You would set up a map that looked like this:

Create Import Mapping

Delimited File Map

MAP NAME

DELIMITER

Skip First Header Record

FIELD NAME	FIELD POSITION	STRIP ZEROS
From Account Number (34)	<input type="text" value="1"/>	<input checked="" type="checkbox"/>
To Account Number (34)	<input type="text" value="2"/>	<input checked="" type="checkbox"/>
Amount (10)	<input type="text" value="4"/>	<input type="checkbox"/>
Processing Date (8)	<input type="text" value="3"/>	
Optional Additional Info (80)	<input type="text" value="5"/>	
Optional Sequence Number (3) <small>Sequence Number determines specific processing order</small>	<input type="text" value="6"/>	

Note these details:

- There's a header record that has to be skipped
- Leading zeroes will be stripped from the account numbers
- The date field precedes the amount field in the file, so the assigned field positions are 4 and 3, respectively
